

Doctor Discussion Guide

This is your doctor discussion guide. Use it to talk to your doctor or someone on your cystic fibrosis (CF) care team about *Pseudomonas aeruginosa* and how to fight it.

Print it, save it, or just keep it open in a new tab to use on a virtual visit.

Questions You May Want to Ask

- + What medications are critical for me to keep feeling my best?
 - + I haven't been taking my inhaled antibiotics. Can you help me get back on track?
 - + I'm feeling better with my other CF treatments, so why do I need to take my treatment for *Pseudomonas aeruginosa*?
 - + I'm concerned that *Pseudomonas aeruginosa* could be hiding in my lungs.
-
- + Are the CF treatments I'm taking now protecting me from *Pseudomonas aeruginosa*?
 - + Does chronic *Pseudomonas aeruginosa* ever go away?
 - + Managing multiple treatments for CF along with a busy lifestyle is hard. How do others you know do it?
 - + What could happen if I don't take my treatment for *Pseudomonas aeruginosa*?

Did you know?

A single *Pseudomonas aeruginosa* infection could cause damage to the lungs.
